

Improvements to the waterfront trail are essential in Riverfront Park. The future Clearwater dock complex should include a restroom/interpretive center and an outdoor educational station. The Bridge over Mill Creek is needed to complete the southern connection to the Fort Crailo neighborhood.

The baseball field in Riverfront Park is in need of restoration including minor alignment changes, new bleachers and in-field repairs. In addition, the parking lot needs additional lighting, landscaping, new pavement and striping.

The north parking lot and access road should be redesigned to include improved landscaping and new pavement, striping, lighting and sidewalks. In addition, the existing tennis court/basketball facility is in need of repair and resurfacing. Additional lighting and pathway improvements are required for safety purposes.

A new pedestrian plaza will improve connectivity of Riverfront Park to the Central Business District. This area will need berming reduce visual and noise impacts associated with the 787 on-ramp. Improved lighting, landscaping and hard surfaces will be required to create an attractive plaza and entrance to Riverfront Park.
